SUMMARY

Motivated and detail-oriented Honours Bachelor of Technology – Software Development student with a passion for web and cloud programming. Experienced in building full-stack applications through academic and personal projects, with hands-on skills in frontend, backend, and API integration. Seeking a Software Developer Intern role to apply technical knowledge and grow in a collaborative environment.

EDUCATION

Seneca Polytechnic, Toronto, ON

January 2024 – Present

Honours Bachelor of Technology – Software Development

SKILLS

- **Technical:** Python, C, C++, HTML, CSS, JavaScript (ES6+), React, Node.js, Express.js, MySQL, MongoDB, Git/GitHub, GitHub Actions, AWS (DynamoDB, S3, ECS, ECR, Cognito), Docker (basic), Docker Compose.
- **Core Competencies:** Teamwork, Communication, Problem – Solving
- **Languages:** Vietnamese (Fluent), English (Proficient)

TECHNICAL PROJECTS

Fragments Microservice – Cloud-Based Data Management API

September 2025 – December 2025

github.com/Hiumonday16/fragments

- Production-ready RESTful API using Node.js and Express for managing text, image, and JSON data
- Integrated AWS services: DynamoDB, S3, ECS, Cognito (JWT-based authentication)
- Built CI/CD pipeline with GitHub Actions, automated testing (Jest, Hurl), and Docker deployment
- Implemented production-grade features: structured logging, security middleware, and graceful shutdown.

NomNomSnack – Snack E-Commerce Website (Team Project)

March 2025 – April 2025

github.com/Group-25-BTP405-NBB/backend

- Contributed to the development of NomNomSnack, a web application for selling Vietnamese snacks.
- Designed and implemented a secure user authentication system (registration, login, password hashing, session management).
- Added role-based access control to differentiate between customer and admin users.

Weather Web Application (Personal Project)

March 2024 – May 2024

github.com/Hiumonday16/A6_Weather-App

- Created a responsive app for real - time weather data using a third-party API.
- Designed a user interface with HTML, CSS, and JavaScript.
- Implemented asynchronous programming for efficient API integration.
- Ensured cross-browser compatibility through thorough testing.

EXTRA-CURRICULAR

Group Presentation: Unreal Engine Overview

September 2024 – October 2024

Course Project

- Researched and presented core Unreal Engine features and real-world applications in game development and simulation
- Collaborated with team members to prepare technical explanations and demonstrations
- Responded to questions during presentation, explaining software concepts clearly to a non-expert audience.

WORK EXPERIENCE

Information Technology Systems Technologist (Co-op)

April 2026 – August 2026

Seneca Polytechnic ITS Student Service Desk, Toronto, ON

- Provided technical support to students through walk-ins, Omni Chat, and the Salesforce ticket system across multiple campuses
- Assisted users with account access, password resets, software issues, printing services, and general troubleshooting
- Supported Computing Commons operations and laptop loan services while following ITS procedures and service standards
- Communicated technical information clearly to students with different levels of technical knowledge.
- Collaborated with team members and staff to resolve technical issues efficiently in a fast-paced support environment

Kitchen Helper

November 2025 – Present

Mi BOWL MEAL, Toronto, ON

- Prepared and portioned food items accurately into containers while maintaining cleanliness and food safety standards
- Assisted with printing, verifying, and affixing labels to food containers and delivery bags to ensure order accuracy
- Worked efficiently in a fast-paced team environment, following procedures and meeting time-sensitive deadlines
- Demonstrated attention to detail and reliability during high-volume service periods.
